

34" Curved Monitor

With the Gearlab 34" ultra-wide screen and 21:9 WQHD screen resolution of 3440x1440 pixels, you get all the workspace you need to comfortably multi-task on a single screen.

The DP1.4 and HDMI2.0 ports offers multiple 4K connectivity options, while the slim panel and elegant VESA-compatible Y-stand bring performance and style to your desk, both at work and at home.

Picture-by-Picture (PBP) function displays input from two sources side-by-side at their native resolution. And for optimal multi-tasking, Picture-in-Picture (PIP) lets you resize the second source to up to 25% of the screen and position it anywhere.

AMD FreeSync synchronizes the refresh rate of your compatible graphics card to reduce image tear and stutter. Low Input Lag Mode minimizes the delay between mouse, keyboard, or joystick input and on-screen response for a smoother gaming experience.

The Gearlab® 34" Ultra-Wide Curved monitor comes with a tiltable and height adjustable desktop stand
